APPLICATIONS

ROOFS

FOUNDATIONS

DESCRIPTION

SOPRA TPE MPX COLLAR are designed for the secure connection of waterproof bituminous membranes to pipe penetrations or service elements passing through the roof system.

SOPRA TPE MPX COLLAR shank features a tapered profile, allowing compatibility with pipes of varying diameters and ensuring ease of installation. The perforated flange is specifically engineered to promote effective adhesion during gas welding with bituminous membranes.

SOPRA TPE MPX COLLAR are fully compatible with both APP and SBS-modified bituminous membranes. For optimal performance, installation is recommended in a sandwich configuration, positioned between two layers of membrane.

APPLICATION

- SOPRA TPE MPX COLLAR is installed between two layers of SOPREMA bitumen membranes for long term performance of the system. To improve adhesion, a thin coat of primer can be applied on. Around the elements that come out from the roof or foundation it is necessary to place a permanent M1 SEALANT between SOPRA TPE MPX COLLAR and the element that come out from the roof or foundation and, subsequently, tighten the upper end with a stainless steel clamp.
- SOPRA TPE MPX COLLAR is compatible with all the accessories and membrane in the Soprema bitumen range.

FOR COMPLETE INFORMATION ON PRODUCT INSTALLATION, PLEASE CONSULT YOUR SOPREMA REPRESENTATIVE.
