SOPRA TPE VAPOUR AERATOR

TECHNICAL DATA SHEET

ANZ-TDS-143-SOPRA TPE VAPOUR AERATOR

DESCRIPTION

SOPRA TPE VAPOUR AERATOR has been designed to aid the dynamic extraction of water vapour that forms between the roof slab and the waterproof roofing felt. The base of the SOPRA TPE VAPOUR AERATOR flange, which is placed in contact with the roof slab, has 16 duct ribs that keep the roofing felt lifted to aid the escape of hot air which continuously forms between the roof slab and the waterproofing.

The base of the shank has a reinforced curb to guarantee total protection of the SOPRA TPE VAPOUR AERATOR installation; the upper section has 3 lateral portholes and an open top hole to ensure efficient aeration.

The SOPRA TPE VAPOUR AERATOR TOP has three wings with a dual function:

- As an anchor to guarantee fast fitting of the SOPRA TPE VAPOUR AERATOR TOP to the SOPRA TPE VAPOUR AERATOR even in particularly windy areas
- As a spacer to maintain the gap between the SOPRA TPE VAPOUR AERATOR TOP and the upper lip of the shank, to increase the aeration surface

The curved form of the SOPRA TPE VAPOUR AERATOR TOP aids expulsion of the condensate that continuously forms, expelling it well away from the outside of the shank.

SOPRA TPE VAPOUR AERATOR TOP ESTRAER used as a replacement for the normal cup increases the dynamic suction capacity thanks to the special trumpet like design that makes the most of the Venturi pipe's suction properties, always guaranteeing the best suction in any situation.

APPLICATION

- We recommend 3 to 4 SOPRA TPE VAPOUR AERATOR for every 100 m² in combination with SOPREMA bitumen waterproofing systems.

FOR COMPLETE INFORMATION ON PRODUCT INSTALLATION, PLEASE CONSULT YOUR SOPREMA REPRESENTATIVE.

PROPERTIES

SPECIFICATIONS	SOPRA TPE VAPOUR AERATOR				
	A	B	C	H	PCS PER BOX
SOPRA TPE VAPOUR AERATOR H160	388 mm	128 mm	73 mm	160 mm	20
SOPRA TPE VAPOUR AERATOR H240	320 mm	77 mm	73 mm	240 mm	20
SOPRA TPE VAPOUR AERATOR H400	388 mm	128 mm	73 mm	400 mm	10
